Don't just convert documents, transform them with OmniPage Ultimate

Today the continued use of paper slows organisations down and frequently leads to "knowledge recreation." Not only does this waste time – as you are forced to recreate information from existing paper or search for misplaced documents – but it is also a drain on overall productivity and profitability.

Additionally small businesses and individuals under utilise millions of scanning devices that could save valuable time and effort. Finally, PDF documents, the digital version of paper, are prolific but can be difficult to edit or repurpose.

The question remains: "How can you get the document into the format you want without having to do extensive retyping or re-editing?"

The answer is OmniPage® Ultimate. This innovative solution converts paper, PDF files and forms into documents you can automatically send to others, edit on your PC or archive in a document repository. OmniPage Ultimate provides the speed, quality and features to make it the perfect choice to; save valuable time, reduce costs, get the most out of all your scanning devices and increase productivity for everyone.
