POWER SEARCH

MatriX™

cnet CNET.com

PowerSearch

The rapid "PowerSearch" enables customers to easily find the exact products are looking for. Thanks to it's innovative search modules such as "Type Ahead", misspelling suggestions and relevance ranking, your customers will never have a hard time finding products and "PowerSearch" administrates itself and requires no management.

MatriX™

Tech Data Nettailer MatriX gives you flexibility and total control over your margins. When the customer logs into the store they will see their advanced and exclusive pricing for all products made available to them.

CNET DataSource

The CNET DataSource converts non-standardised product information from multiple manufacturers and processes it into a broad and deep product catalogue. CNET powers your webstore with the most comprehensive product information and images available on the market.
